STAINLESS STEEL LETTERBOX

FD30 & FD60 compliant

60 minute
fire-rated

must be fitted with intumescent liner provided & positioned in door as per fitting instructions

SUPA™ STYLE FIRE-RATED LETTERPLATE

The SUPA™ Style Fire-Rated letterplate designed in house by Mila's specialist product development team, has been independently fire tested at Exova and passed the FD60 fire test at 66 minutes.

The Supa™ Style letterplate features a stainless steel flap which is available in 3 finishes with a matt black powder coated frame. The sleek design incorporates a patented concealed flap operating mechanism to maintain subtle exterior sightlines. The letterplate assembly is surrounded with an intumescent liner which provides in excess of 60 minutes fire resistance.

The Supa™ Style fire-rated letterplate features internal and external thumb access for ease of use. When fully open both internal and external flaps open to 180° without over stressing and smart frame design prevents abrasive action against the flap during operation. A combination of external foam and internal nylon brushes maximises weather sealing.

Independently tested to industry standards at Exova, the Supa™ Style letterplate has been cycle tested to 50,000 cycles and has superior corrosion resistance, achieving 1000 hours in a salt spray chamber.

The letterbox is available in three Supa™ stainless steel finishes and two telescopic sleeve sets to suit door thickness 20-40mm and 40-80mm.

Note. Must be fitted with intumescent liner provided and positioned in door as per fitting instructions
